

Subject Index for the Special Issue on LISS 2013

- CBIR, 1
- chemical park, 75
- cloud computing, 75
- cluster analysis, 11
- color coherence vector, 1
- color feature, 1
- color histogram, 1

- dark web, 21
- data with business rules modelling, 63

- e-government, 11
- emergency decision, 75
- emergency management, 75

- facts with contexts modelling, 63
- framework design, 75

- genetic simulated annealing algorithm, 31
- gray comprehensive evaluation method, 53

- individual knowledge management
 - maturity model, 53
- information system, 75

- linguistic information system, 41
- logistics distribution center, 31

- machine understanding, 41
- mathematical mode, 31

- OLAP systems design, 63
- OLTP systems design, 63

- predictive model, 21
- public hotspot information, 11

- semiotics, 41
- signalling, 21

- texture, 1
- time-window, 31

- utterance, 41

- vehicle routing problem, 31

- web log analysis, 11
- whitening weight function, 53
