

Subject Index: CIT Vol. 14 (2006), N° 1–4

- 3D printing, 45
- 3D virtual interaction, 1
- Active contours, 7
- Active documents, 175
- Adaptation, 175
- Agile processes, 197
- AHC, 283
- Annotations, 175
- Anthropology, 1
- Aspectj, 111
- Aspect-oriented programming, 111
- Aspect-oriented programming, 343
- Attacks, 217
- Attribute grammars, 343
- Authoring systems, 161
- Bone relocation, 53
- Built-in e-mail handler, 267
- CAD-CAM, 65
- Chasm, 197
- Collaborative learning, 267
- Collocation extraction, 321
- Communication networks, 133
- Communication support, 267
- Community building, 175
- Compiler/interpreter generator, 343
- Composition filters, 111
- Compression, 255
- Computer network, 217
- Computer-aided, 21
- Computer-assisted surgery, 71
- Computer-assisted surgery planning, 53
- Condor-G, 329
- Congestion control, 337
- Constraints, 225
- Context-dependent acoustic modelling, 307
- Convergence, 133
- Corpus based speech synthesis, 307
- Corpus statistics, 321
- Craniofacial reconstruction, 7
- Cranio-facial reconstruction, 21
- Cranio-maxillofacial surgery, 53
- Croatian speech corpora, 307
- CT imaging, 45
- Data mining, 291
- Data warehouse, 291
- Database systems, 243
- Digital libraries, 175
- Digital libraries, 191
- Directional wavelet transform, 299
- Discrete tomography, 101
- Discrete-event simulation, 133
- Document indexing, 321
- Egypt, 45
- Elastic registration, 31
- E-learning, 141
- Electronic encyclopaedias, 175
- Encryption, 255
- Enterprise, 197
- Esthetic and reconstructive surgery, 65
- Evaluation, 275
- Execution management, 329
- Face reconstruction, 1
- Facial reconstruction, 31
- Fan-beam projections, 101
- Filters, 315
- Finite-element simulation, 53
- Forensic facial reconstruction, 45
- Forensic workplace, 7
- Forensics, 1
- Forensics, 7
- Formal model, 207
- Frameless stereotaxy, 71
- GPRS, 255
- Graphical user interface, 267
- Grid scheduling, 329
- Hidden Markov models, 307
- Hypertext, 161
- IDS, 217
- Image enhancement, 299
- Implants, 65
- Information retrieval, 191
- Intelligent tutoring systems, 275
- Intraoperative navigation, 71
- J2ME, 255
- Knowledge brokering systems, 175
- Knowledge management, 175
- Latent semantic indexing, 191
- Linked XML documents, 225
- Matchmaking, 329
- Maxillofacial surgery, 1
- Missing data reconstruction, 31
- Mobile agent, 217
- Mobile agents, 337
- Mobile devices, 243
- Model transformation, 111
- Model-driven architecture, 111
- Multi-class problems, 283
- Mummies, 45
- Navigational surgery, 71
- Neural networks, 315
- Noise reduction, 315

Nonlinear warping, 7
Non-TCP flows, 337
ORDB, 225
Osteotomies, 53
Outlier detection, 291
Pedagogy, 141
Performance analysis, 133
Performance benchmark, 149
Publishing systems, 161
Recursive function, 81
RMI, 255
Segmentation, 7
Semi-structured data, 225
Simulated annealing, 101
Simulation, 337
Singular value decomposition, 191
SMS messages, 243
Soft tissue modeling, 1
Soft tissue prediction, 53
Software development, 197
Spatio-temporal data, 291
Spatio-temporal database applications, 207
SQL, 81
Statistical model, 31
Statistical models, 21
Statistical natural language processing, 321
Student modelling, 275
SVM, 283
TCP flows, 337
Technology adoption lifecycle, 197
Testing tool, 149
Thin-plate splines, 7
Thin-plate splines, 21
TPC-W, 149
Tracking, 175
Traffic modelling, 133
Traffic-flow analysis, 133
Transclusions, 161
Translation, 81
Vector space model, 191
Virtual learning environment, 141
Visual simulator, 267
Visualization, 53
WAP protocol, 243
Wavelet transform, 299
Web-based application, 243
Web-based applications, 161
Wireless, 255
Wireless networks, 243
Xanalogical structure, 161
XML, 225
XML, 243
XML update language, 81
Xquery, 81
XSLT, 243
