

Subject Index: CIT Vol. 9 (2001), N° 1–4

- Air pollution, 207
- ANOM, 197
- Artificial intelligence, 1
- Automatic programming, 71
- Backpropagation in neural networks, 1
- CASE tool, 71
- Code generation, 289
- Communication networks, 15
- Competence, 167
- Compilation, 305
- Computational geometry, 227
- Conclusion-making systems, 123
- Conjugate gradient method, 1
- COTS adoption, 263
- Course/teacher evaluation, 197
- CPD model, 167
- CRM, 197
- DEMNET, 153
- Device-based model, 29
- Directional graph, 239
- Discrete-event simulation, 15
- Divergence-covering combination, 239
- Domain-specific language, 263
- E-commerce, 185
- Electric power plant, 29
- Embedded system, 247
- Europe, 177
- General-purpose language, 263
- Gridded spatial data, 227
- Harvesting, 207
- Heuristic solvability, 213
- High-performance computing, 289
- Hungarian Telecottage Association, 153
- Immutability, 305
- Importance sampling, 15
- Independent statement block, 239
- Information and communications technology, 177
- Information Extraction, 55
- Information modeling, 29
- Information Society, 153
- Information technology, 143
- IT Society, 153
- Iterative algorithms, 219
- Jackson Structured Programming, 71
- JSP, 71
- Knowledge Attributed Petri Net, 133
- Knowledge Base, 133
- Knowledge economy, 177
- Language extension, 263
- Learning theory, 113
- Lifelong learning, 167
- Load balancing, 43
- Local community, 153
- LOESS, 207
- Maximal throughput, 213
- Medical diagnostics, 123
- Message passing, 43
- Microcontroller, 247
- Minimal delay, 213
- Model checking, 185
- Mortality, 207
- Mortality displacement, 207
- MPI, 43
- Multidimensional languages, 233
- Multihop, 213
- National Telecottage Programme, 153
- Natural Language Engineering, 55
- Neural networks, 113, 123
- Nonlinear unconstrained programming, 1
- Object-oriented framework, 219
- Object oriented languages, 305
- Object-oriented model, 29
- Optical character recognition, 101
- Optimization, 219
- Organisational strategies, 167
- Performance analysis, 15
- Problem-solving environments, 289
- Process migration, 43
- Process signal base, 29
- Program executive path, 239
- Program semantics, 239
- Program specifications, 71
- Programming paradigms, 305
- Pseudo code, 71
- PVM, 43
- Questionnaire, 81
- Railway simulation, 133
- Real-time operating system, 247
- Rearrangeable optical networks, 213
- Resource management, 43
- Route-covering combination, 239
- Rural area, 153
- SAS application, 197
- Scheduling, 133
- Scientific computation, 289
- Secure transactions, 185
- SISP, 81
- Slovenia, 143
- Small firms, 143
- Soft computing, 113
- Statistical analysis, 197
- Steepest descent method, 1
- STL, 207
- Strategic IT usage, 143
- Strategic planning, 81
- Survey, 81
- Tabu search, 213
- Telecentres, 153
- Telecottage, 153

Telehut, 153
Temporal semistructured data, 233
Tessellation, 227
Traffic modelling, 15
Unified language, 305
US-AID, 153
User-definable template interfaces, 55
Walsh transformation, 101
Workstation clusters, 43
XML, 233, 263
