

Subject Index: CIT Vol. 26 (2018), N° 1–4

- acute lymphoblastic leukemia, 131
- background subtraction algorithm, 29
- basis expansion matrix modelling (BEM), 141
- bitmap, 209
- Bluetooth, 235
- clustering, 57
- cognitive radio, 167
- collaborative recommender systems, 45
- coloured Petri Nets, 85
- component allocation, 85
- compressed binary string, 99
- contour of athlete's body, 29
- data dissemination, 157
- data mining, 209
- data visualization, 57
- distance transformation, 29
- DNS64, 19
- doppler frequency shifts (DFS), 141
- dynamic itemset counting, 209
- dynamic spectrum access, 167
- dynamic time warping (DTW), 179
- dynamic XML update, 99
- embedded systems, 85
- heterogeneous systems, 85
- IEEE 802.15.4, 69
- information presentation, 1
- Intel Xeon Phi, 209
- inter carrier interference (ICI), 141
- Internet, 19
- IPv6 deployment, 19
- IPv6 transition solutions, 19
- K-mode, 57
- KNN classifier, 131
- label generation time, 99
- label size, 99
- lexicographic order, 99
- link lifetime, 251
- link-state, 223
- load balancing, 223
- many-core system, 209
- mapping, 115
- market segmentation, 57
- mobile risk, 157
- model-driven engineering, 85
- modified token-based congestion control scheme, 7
- morphology, 131
- multi-path routing, 223
- multi-platform, 235
- multimedia services, 267
- multiple devices, 235
- multiple input multiple output (MIMO) systems, 141
- node disjoint multipath, 251
- noncritical nodes, 251
- obfuscated attack, 45
- OpenMP, 209
- Opportunistic Networks, 7
- orthogonal frequency division multiplex (OFDM) systems, 14
- parallel algorithm, 209
- performance analysis, 19
- performance measuring, 157
- pose estimation method, 29
- power control, 167
- principal component analysis (PCA), 57
- prophet routing protocol, 7
- quality metrics, 267
- Quality of Experience (QoE), 267
- Quality of Service (QoS), 267
- random forest classifier, 45
- RDF, 115
- routing attacks, 251
- rowing machine, 29
- search engine, 1
- secure channel, 235
- segmentation, 131
- signal to noise ratio (SNR), 141
- silhouette based adaptive background image, 29
- similarity matching, 179
- simulation, 157
- spatial index, 191
- spectrum allocation, 167
- SVM, 45
- temporal RDF, 115
- temporal XML, 115

time series, 191
token-based congestion control, 7

uncertain time series, 179
uncertainty, 191
update performance, 99
user interaction, 1

VANET, 157
varying distance threshold, 191
vehicular ad hoc, 141
vehicular ad-hoc networks (VANETs), 267

WBAN, 69
WBC, 131
WBSN, 69
weighted DTW, 179
Wi-Fi, 69
wireless, 235
wireless mesh network, 223
wireless sensors, 69

XML tree, 99
