

## Subject Index: CIT Vol. 29 (2021), N° 1–4

---

- Access control, (4) 219–234  
 Agricultural product (AP) marketing, (3) 151–165  
 Agricultural production, (3) 151–165  
  
 Big data analysis, (3) 151–165, (4) 251–263  
  
 Chaos Based Communication, (2) 89–111  
 Chinese Word Segmentation, (2) 113–131  
 Cloud based storage, (4) 219–234  
 Clustering, (3) 133–149  
 Clustering-anonymity, (1) 1–12  
 Cognitive radio, (2) 77–88  
 Combination model, (1) 27–38  
 Consortium blockchain, (4) 235–250  
 Customer inquiry, (3) 181–207  
  
 Data visualization, (4) 251–263  
 DEMATEL, (3) 167–180  
 Denoising autoencoder, (1) 39–56  
 Direction, (1) 1–12  
 Distance, (1) 1–12  
  
 EMRs, (4) 235–250  
 Energy detection, (2) 77–88  
 Engineering education, (1) 13–26  
 Event-triggered mechanism, (2) 57–75  
  
 Fake accounts, (3) 133–149  
  
 Hazard Analysis, (2) 113–131  
 Hierarchical storage management, (4) 219–234  
  
 Influencing factors, (3) 167–180  
 Intelligent agriculture, (3) 151–165, (4) 251–263  
 IoT Security, (2) 89–111  
 Iron ore spot price, (1) 27–38  
 ISM, (3) 167–180  
  
 Logistic system, (3) 181–207  
  
 Machine translation, (1) 39–56  
 Markov jumping system, (2) 57–75  
 Mobile primary users, (2) 77–88  
 Modelling, (3) 181–207  
  
 Network control systems, (2) 57–75  
 Neural machine translation, (1) 39–56  
  
 Observer, (2) 57–75  
 Online social networks, (3) 133–149  
 Optimization, (3) 181–207  
  
 Phrase-based statistical machine translation, (1) 39–56  
 Physical Layer Security, (2) 89–111  
 Position detection, (2) 77–88  
 Pre-ordering, (1) 39–56  
 Price projection, (1) 27–38  
 Privacy-preserving, (1) 1–12  
 Privacy-Protecting, (4) 235–250  
  
 Robust fault-tolerant control, (2) 57–75  
  
 Safety Management, (2) 113–131  
 Security and privacy, (4) 219–234  
 Self-balancing bicycle, (1) 13–26  
 Simulation, (3) 181–207  
 Smart car competition, (1) 13–26  
 Smart court, (3) 167–180  
 Soft skills, (4) 209–218  
 Software project, (4) 209–218  
 Software requirement engineering, (4) 209–218  
 Spam, (3) 133–149  
 Supply chain, (3) 181–207  
  
 Text Mining, (2) 113–131  
 Text Segmentation, (2) 113–131  
 Thin-Client, (4) 235–250  
 Trajectory data, (1) 1–12  
  
 User emulation attacks, (2) 77–88
