

## Subject Index: CIT Vol. 30 (2022), N° 1–4

---

- 5G, (3) 139–159
- Abnormal behavior prediction, (1) 35–50
- Agile methodology, (2) 117–137
- AIoU loss, (4) 239–256
- AODV, (2) 67–83
- Attention mechanism, (4) 239–256
- Automatic essay scoring, (2) 85–99
- Back propagation, (3) 175–192
- Blockchain, (3) 175–192
- BP neural network algorithm, (3) 175–192
- Cloud computing, (3) 139–159
- Cloudlet, (3) 139–159
- Cogency, (1) 1–21
- Confabulation, (1) 1–21
- Critical success factors, (2) 117–137
- CS-NMS, (4) 239–256
- Cyber security, (2) 67–83
- Data mining, (4) 205–222
- Deep learning, (2) 101–115, (4) 223–238, (4) 257–273
- Deep neural network, (4) 275–289
- Digital human resource management, (HRM), (1) 23–33
- Discussion forum, (2) 85–99
- Electronic mutual sensor, (4) 205–222
- Emotion recognition, (4) 275–289
- Fault, (4) 223–238
- Financial risk prediction, (3) 161–174
- Fog computing, (3) 139–159
- Improved Beetle Antennae Search Algorithm, (improved BAS algorithm), (2) 101–115
- Intelligent energy-saving operation system, (2) 101–115
- Interactive behavior analysis, (1) 51–65
- Keyword extraction, (3) 193–204
- Language feature dimension, (4) 275–289
- Linear discriminant analysis, (LDA), (3) 193–204
- Long and shortterm memory network, (3) 175–192
- Machine learning, (1) 1–21
- MANET, (2) 67–83
- Mobile robots, (4) 257–273
- Model fusion, (1) 35–50
- Monolingual model, (2) 85–99
- Multi-access edge computing, (3) 139–159
- Multilingual model, (2) 85–99
- Multi-object detection, (4) 239–256
- Negative emotion, (4) 275–289
- Neo-model, (4) 257–273
- Network buzzwords, (4) 275–289
- Network protocols, (2) 67–83
- N-Gram, (3) 193–204
- OLCI, (1) 1–21
- OMNET++, (2) 67–83
- Online short videos, (1) 51–65
- Optimized Generalized Regression Neural Network, (optimized GRNN), (2) 101–115
- PCA, (4) 205–222
- Prediction model, (4) 223–238
- Predictive control, (2) 101–115
- Probabilistic neural network, (3) 161–174
- Project outcomes, (2) 117–137
- Q-statistic, (4) 205–222
- Ratio difference characteristic, (4) 205–222
- ResNet, (4) 257–273
- Risk event, (1) 23–33
- Risk prediction, (1) 23–33
- Root-mean-square error, (3) 175–192
- Security, (2) 67–83
- Self-organizing mapping neural network, (3) 161–174
- Sentence transformers, (2) 85–99
- Sentinel-3, (1) 1–21
- Short-term power demand, (3) 175–192
- Software project, (2) 117–137
- Split attention, (4) 257–273
- Survivability, (2) 67–83
- SVM, (4) 205–222
- Telecom fraud detection, (1) 35–50
- TensorFlow, (4) 223–238
- TF-IDF, (3) 193–204
- Transformer, (4) 223–238
- User behavior analysis, (1) 35–50
- User interaction, (1) 51–65
- Visual navigation, (4) 257–273
- YOLOv5s, (4) 239–256
